## PROJECTS

---

### ➤ **Member of Technical Staff-II, Adobe Systems Pvt. Ltd.** **(Apr'17 to present)**

#### **Projects:**

- **Adobe AIR** - The Adobe AIR runtime enables developers to package the same code into native applications and games for Windows and Mac OS desktops as well as iOS and Android devices, reaching over a billion desktop systems and mobile app stores for over 500 million devices.

### ➤ **Software Developer, Snapdeal.com, Gurgaon** **(Jul'15 to Mar'2017)**

#### **Projects:**

- **Scraper** -A distributed scalable backend system that automatically crawls the competition website (Flipkart, Amazon, PayTM, etc.) for the various concerned specs for a huge. As an E-Commerce platform, competitor prices help in pricing of products in competitive manner. So, this was the core component of whole pricing systems.
- **Price Analytics** - It is a analytics based project which include many models like Brand-discount, Multivariate etc. It analyzes the product behavior like visits, units sold, competition price etc. and best offer price is predicted

keeping our business targets and validations in consideration.

- **Price-Simulator** -A distributed scalable rule based automated system (Front end + Backend) to process any trigger which has potential for changing price of a product for the entire assortment of snapdeal real-time. Price-Simulator take feeds like Competition prices, selling price change, Product Rating change etc. from many sources through database or Apache Kafka and on that basis appropriate rule is applied for deciding the product price.
- **Block the Call** (College Mini Project) -An Android App to block unwanted calls. It has UI Screen to facilitate adding numbers in list (block list), which you want to block. This app automatically block call from unsaved contact, block list depending upon preferences of user
